Events

Michael Rovatsos (University of Edinburgh; mrovatso@inf.ed.ac.uk)

This section features information about upcoming events relevant to the readers of AI Matters, including those supported by SIGAI. We would love to hear from you if you are organizing an event and would be interested in cooperating with SIGAI, or if you have announcements relevant to SIGAI. For more information about conference support visit sigai.acm.org/activities/requesting_sponsorship.html.

21st International Conference on Entreprise Information Systems

Heraklion, Crete, Greece, May 3-5, 2019
www.iceis.org
The purpose of the 21st International Conference on Enterprise Information Systems (ICEIS) is to bring together researchers, engineers and practitioners interested in the advances and business applications of information systems. Six simultaneous tracks will be held, covering different aspects of Enterprise Information Systems Applications, including Enterprise Database Technology, Systems Integration, Artificial Intelligence, Decision Support Systems, Information Systems Analysis and Specification, Internet Computing, Electronic Commerce, Human Factors and Enterprise Architecture. ICEIS 2019 will be held in conjunction with ENASE 2019, GISTAM 2019 and FEMIB 2019.

2018 IEEE/WIC/ACM International Conference on Web Intelligence

Santiago, Chile, December 3-6, 2018
webintelligence2018.com
Web Intelligence (WI) aims to achieve a multi-disciplinary balance between research advances in the fields of collective intelligence, data science, human-centric computing, knowledge management, and network science. It is committed to addressing research that deepens the understanding of computational, logical, cognitive, physical as well as business and social foundations of the future Web, and enables the development and application of intelligent technologies. WI'18 features high-quality, original research papers and real-world applications in all theoretical and technological areas that make up the field of WI. WI'18 welcomes research, application as well as Industry/Demo-Track paper submissions. Tutorial, Workshop and Special-Session proposals and papers are also welcome.

14th ACM/IEEE International Conference on Human-Robot Interaction

Daegu, Korea, March 11-14, 2019
humanrobotinteraction.org/2019
HRI 2019 is the 14th annual conference for basic and applied human-robot interaction research. Researchers from across the world attend and submit their best work to HRI to exchange ideas about the latest theories, technology, data, and videos furthering the state-of- the-art in human-robot interaction. Each year, the HRI Conference highlights a particular area through a theme. The theme of HRI 2019 is "Collaborative HRI". The HRI conference is a highly selective annual international conference that aims to showcase the very best interdisciplinary and multidisciplinary research in human-robot interaction with roots in and broad participation from communities that include but not limited to robotics, human-computer interaction, human factors, artificial intelligence, engineering, and social and behavioral sciences.

11th International Joint Conference on Biomedical Engineering Systems and Technologies

Prague, Czech Republic, February 22-24, 2019
www.biostec.org
The purpose of BIOSTEC is to bring together researchers and practitioners, including engineers, biologists, health professionals and informatics/computer scientists, interested in

both theoretical advances and applications of information systems, artificial intelligence, signal processing, electronics and other engineering tools in knowledge areas related to biology and medicine. BIOSTEC is composed of five co-located conferences, each specialized in a different knowledge area. BIOSTEC 2019 will be held in conjunction with MODELSWARD 2019 and ICISSP 2019. Registration to BIOSTEC allows free access to the MODELSWARD and ICISSP conferences (as a non-speaker).

Michael Rovatsos is the Conference Coordination Officer for ACM SIGAI, and a faculty member at the University of Edinburgh. His research is in multiagent systems and human-friendly AI. Contact him at mrovatso@inf.ed.ac.uk.
